DETAILED ACTION

Examiner acknowledges receipt of paper number 8 filed 4/19/01.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation in claims 4 and 18 of "glacier SG 809 A" confusing. "Glacier SG 809 A" appears to be trade name. Claims 4 and 18 contain the trademark/trade name Glacier SG 809 A. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a particular type of fragrance and, accordingly, the identification/description is indefinite.

Applicants in the response to the first office action indicated that an explanation would be submitted. However, no evidence as to a wide use of the term in places other than the United

States has been presented. Applicants are required to use the appropriate non-trade mark term defining the particular fragrance in the claims.

3. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1 and 4 recite the broad recitation of the whole body and at least one fragrance respectively, and the claims also recite in particular sensitive body parts and "glacier SG 809 A" respectively which is the narrower statement of the range/limitation.

Applicants' attorney agreed on 08/09/01 to delete the "in particular" terms to overcome this rejection.

Art Unit: 1615

5. Claims 5 and 7-15 were objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim refer to other claims in the alternative only and can not depend from other multiple dependent claims. See MPEP § 608.01(n). The objection is not maintained in light of the amendment filed 4/91/01.

Claim Rejections - 35 USC § 103

6. Claims 1-3 and 1-13 were rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' admitted prior art in view of Koga (JP 10,231,238) and Fowler et al. respectively. These rejections are not maintained because the prior art references do not teach a composition where the menthol/menthyl lactate ranges from about 1/3 to about 1/10.

7. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification and any issues under 35 U.S.C. 112, second paragraph in the claims.
